

Product:	Bee Venom powder
Quality:	Pharma/Food/Cosmetic
Origin:	Europe
Article no.:	7070
Appearance:	powder
Colour:	white to light yellow
Taste:	typical
Odour:	typical
Additives:	none
HS-Code:	3002 4900 89
Packing:	Box
Storing:	dry, cool and dark
Shelf life:	least 2 years at recommended storing conditions

Specification:**Ingredients (average values)**

Apamin content:	≥	1%
Melittin content:	≥	60%
Insoluble remains in water:	≤	10%
pH-Value:		4-6
Water content:	≤	10%

Description:

Bee venom or apitoxin in its raw form is a bitter colourless liquid, which active portion is a mixture of proteins and peptines melittin and apamin. Bee venom causes local inflammation and acts as an anticoagulant. Therefore the usage of bee venom against rheumatism is a classic component of apitherapy. An application in cremes and other cosmetic is common.
