

CosmeticBusiness**The International Trade Fair of the Cosmetics Supplying Industry
30 September to 01 October 2020**

Leipzig, 18 June 2020

**News report for CosmeticBusiness 2020: Innovations and
new products from the cosmetics supplying industry**

Inspiration for product development: Exhibitors and companies from the cosmetics supplying industry will introduce innovative new solutions for future product ideas in the cosmetics industry at CosmeticBusiness 2020 from 30 September to 1 October. MOC Munich visitors will once again receive detailed insights into trends, innovative products and new developments in the fields of raw materials, manufacturing and packaging. A number of themed routes will guide visitors along their way, and this year they are joined by the new Colour Route which will allow visitors to discover products from the colour cosmetics sector. The Innovation Route will guide visitors through innovative and creative highlights of the trade fair. The Green Route will present trends in sustainability. Particularly exclusive solutions can be found on the "Premium Route".

All information in the new product information report is based on information provided by the exhibitors. Leipziger Messe is not liable for the functionality and/or safety of the products presented. The photographs are those of exhibitors or manufacturers and can only be used for editorial reporting in connection with the respective news item and the name of the exhibitor in the photo reference.

Pictures of the new products presented can be downloaded from the website at:

News from the fields of raw materials and manufacturing**P. 2 - 7****News from the packaging sector****P. 7 - 10**

News from the fields of raw materials and manufacturing

CosmeticBusiness 2020 will feature numerous new products and innovations from exhibitors in the raw materials and manufacturing fields. This includes, amongst other things, natural cosmetics with algae from Austria, a phyto-complex with encapsulated CBD which was specially developed for cosmetic applications, a new peptide-based active ingredient and a Kajal eyeliner with integrated herbal seeds.

Coptis SAS:

New version of the Coptis Lab Regulatory Group

Hall 04, Stand C02

The IT and cosmetics market specialist Coptis SAS will present at the exhibition with a new regulatory group for its data management software Coptis LAB. Based on a wide range of regulatory restrictions for International Nomenclature of Cosmetic Ingredients (INCI), Coptis LAB users will soon be able to check the conformity of the product to be exported from each destination country. Furthermore, the automated regulatory analysis can be used to check whether your formula complies with the regulations of the respective country. The advantage: Real-time information and automated warnings about regulatory problems help to reduce time losses in the development process even better.

GW Cosmetics GmbH:

Natural cosmetics with algae from Austria

Hall 3, Stand E16

Austrian care and natural cosmetics specialist GW Cosmetics GmbH will showcase a true "miracle of nature" at CosmeticBusiness: natural cosmetics with spirulina algae. The microalgae is a superfood, contains high levels of vegan protein (54 per cent),

vitamin K, vitamin B12 and important antioxidants such as vitamin A (β -Carotin) and phycocyanin, which are responsible for healthy cell protection, amongst other properties. Furthermore, it also contains minerals such as iron and magnesium, which make a significant contribution to the body's metabolism and a healthy immune system. In contrast, the nutrient-rich microalgae is extremely robust in production: All that's required for it to grow is sunlight, biogenic carbon dioxide, nutrients and purest tap water from Austria.

INTERCO Cosmetics GmbH:
KAJAL EYELINER WITH HERBAL SEEDS
 Hall 1, Stand C07

The Wiesbaden-based manufacturer of colour cosmetics INTERCO Cosmetics, is launching a special kind of no-waste solution, Kajal eyeliner, with integrated herbal seeds on the market. Once the Kajal eyeliner has been finished, it can be planted with the top end facing upwards in a pot with potting soil. When watered regularly, the herbal seeds in the capsule will grow into an edible herbal plant.

LANXESS Distribution GmbH:
Solbrol® FFA Plus
 Hall 2, Stand A16

100 per cent natural ingredients – LANXESS Distribution will present Solbrol® FFA Plus, a new ingredient that is perfect for use in natural cosmetics. Solbrol® FFA Plus features a blend of fruit acids and phenylpropanol with skin moisturising and anti-

microbial properties. All ingredients are completely naturally sourced and GMO-free. As a synergist, Solbrol® FFA Plus is particularly effective against bacteria and fungi, and ensures reliable protection even in the case of hard to conserve formulations such as wet wipes.

ProTec Ingredia GmbH:
Lipobelle Pino C from Mibelle Biochemistry
Hall 3, Stand B01

Hemp has recently developed a reputation as a true "silver bullet" in the cosmetics industry. One of its compounds, Cannabidiol (CBD) is not only purported to have a vast range of health benefits (anti-inflammatory, pain-relieving...) – it also has an extremely positive effect on the complexion in a variety of ways.

This "silver bullet" has now been used by the Swiss Mibelle Group to develop Lipobelle™ Pino C. The phyto-complex with encapsulated CBD was specially developed for cosmetic applications and will be presented by ProTec Ingredia GmbH at CosmeticBusiness 2020.

CBD is encapsulated in a nanoemulsion for Lipobelle™ Pino C, which both facilitates more flexibility for applications in cosmetic products and improves bioavailability in skin. CBD is combined with a Swiss pine extract, which counters inflammations in a similar way.

The anti-inflammatory and regenerative effect of cannabidiol (CBD) is consequently exponentiated with topical application.

Provital, S.A.U.:
Wonderage™
Hall 3, Stand E14

Happiness is the key to beauty – a fact well known by the Spanish manufacturer of cosmetic ingredients Provital, which will be introducing Wonderage™, a well-ageing ingredient that improves not only your skin but also emotional well-being at CosmeticBusiness. The secret behind the success of Wonderage™ is the monk fruit. The gourd plant is native to the Guangxi valley in China, where the population has an above-average life expectancy. Scientists attribute this fact to the environment and a positive attitude towards life in the region.

Sederma GmbH:
SYNCHROLIFE™
Hall 2, Stand D11

SYNCHROLIFE™ is Sederma's newest peptide-based active ingredient that counteracts the harmful effects of digital pollution caused by blue light through resynchronisation of the biorhythm. The innovative product will be presented at CosmeticBusiness 2020.

According to Sederma, SYNCHROLIFE™ reduces signs of skin fatigue and ageing as well as improving skin sensitivity and well-being. Furthermore, SYNCHROLIFE™ increases the hydration, softness and luminosity of the skin and enhances its viscoelastic properties. This reduces wrinkles, dark circles around the eyes and puffiness. SYNCHROLIFE™ is certified as a natural ingredient according to ISO 16128 and is already listed in the IECIC.

SEPPIC GmbH:
MONTANOV™ 202 – Bio-inspired emulsifier for visible improvement
Hall 2, Stand B12

Perfect bio-compatibility for visibly improved skin: The French company Seppic aims to ensure a naturally beautiful complexion with the new O/W emulsifier MONTANOV™ 202. MONTANOV™ 202 forms emulsions which are rich in lamellar phases and lamellar bilayers and feature high stability. Seppic used an innovative ex-vivo method that reveals the organisation of the epidermidis lipids to research the effectiveness of these liquid crystals.

MONTANOV™ 202 is a 100 per cent plant-based, Cosmos and Natrue certified O/W emulsifier. According to Seppic, it enables the formulation of ultra-white lotions and moisturisers with a light, soft feel and matte finish on skin.

Vytrus Biotech S.L.:
KANNABIA SENSE
 Hall 2, Stand B01

KANNABIA SENSE^{PLF}
 The microbiota Whisperer

Enhancing your **well-aging** by the stimulation of cutaneous oxytocin and dopamine synthesis

- New role of skin microbiota in Neuro-cosmetics
- First time claimed: CANNABIS stem cells
- THC & CBD Free Guaranteed

vytrus biotech

The Spanish research company Vytrus Biotech S.L. will demonstrate the healing effects of hemp and present KANNABIA SENSE at CosmeticBusiness. The active ingredient is derived from stem cells of Cannabis sativa and interacts with the microbiome. KANNABIA SENSE produces postbiotics which positively influence the neurochemical network of the skin by stimulating the cutaneous synthesis of oxytocin and dopamine. In vivo tests with a moisturiser (two per cent CANNABIA SENSE) revealed that the active ingredient activates the same brain areas as oxytocin. KANNABIA SENSE is predominately intended for applications in microbial protection, neuro-cosmetics, well-ageing, as well as for psychosensory and sensitive skin treatments.

News from the packaging sector

Whether innovative packaging or high-quality finishing processes, sustainability remains the trend for innovations at CosmeticBusiness 2020. Visitors to the trade fair will discover how the advanced solutions can contribute to improved recycling and resource conservation.

CosMed GmbH & Co. KG: **Sustainable foam applicator - Squeeze Foaming Device** Hall 4, Stand E20

CosMed will showcase an environmentally friendly and easy to recycle foam applicator at CosmeticBusiness with the Squeeze Foaming Device (SFD). The company from East Westphalia developed the dispenser as a package solution made exclusively from polyethylene. In contrast to conventional applicators, steel was not used for the spring mechanism. According to the manufacturer, the new pump system uses less materials and reduces production costs whilst maintaining comparable or even improved soft foam quality. In addition to the complex foam technology, the SFD pump body also features a transport lock and leakage protection. It's also easy to use.

Website: www.cos-med.de

Lifocolor Farben GmbH & Co. KG: **LifoCycle – Masterbatches for recycling** Hall 4, Stand F02

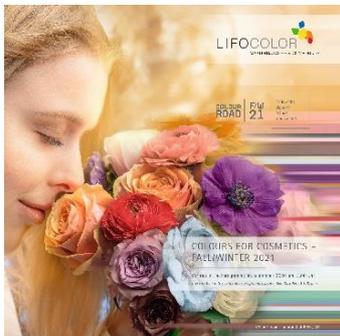

Lifocolor has developed special masterbatches for various recycling processes with LifoCycle. These are available on two carrier systems: On the basis of new goods or recycled carrier systems (PCR). According to the manufacturer, the products displayed at CosmeticBusiness are characterised by their ability to retain invariable colour quality over many recycling cycles. They are available for PP, PE and PET systems. The portfolio also includes detectable masterbatches for sorting processes and LifoCycle Clear for consistent colouring with various PCR qualities.

Website: www.lifocolor.de

Lifocolor Farben GmbH & Co. KG:
Colours for Cosmetics – Fall/Winter 2021

Hall 4, Stand F02

Presentation in the conference programme: 30 September 2020, 1 pm

The association centres in our brains link every smell to past experiences and emotions. Corresponding colour shades are also memorised here. Lifocolor will announce the trend colours that will shape the Fall/Winter 2021 season at CosmeticBusiness 2020 under the motto "Scent of Colours".

Website: www.lifocolor.de

LUMSON SPA:
Techno Airless Aluminium – The first airless system in an aluminium can
 Hall 4, Stand E03

Also featuring at CosmeticBusiness is Techno Airless Aluminium (TAL) a new product innovation from Lumson which, according to the manufacturer, will revolutionise the

packaging world. The packaging was developed and patented by the Italian company. It combines the functional advantages of an airless system with the diverse decoration possibilities of an aluminium can. This system guarantees maximum protection of the formulation inside. TAL stands for sustainable innovation: The packaging is can be easily recycled in a clean manner by separating the polypropylene pump and top cap from the aluminium can and disposing of the individual components in the relevant recycling bins. Lumson has confirmed that both materials are 100 per cent recyclable.

Website: www.lumson.com

Edelmann Group | Edelmann GmbH:
Luxury and high-gloss packaging
 Hall 4, Stand A06/B03

"Go green": The motto behind the expansion of Edelmann's luxury and high-gloss packaging with a variety of sustainable refinements. Spot or full-area varnishing can be achieved through the application of the "offset high-gloss varnish" during the production process. According to the manufacturer, you will achieve a long-lasting and smooth result. In contrast to film lamination, spot varnishing can also be achieved with the "Offset Softtouch Varnish". The varnished surface is pleasant and velvety to touch - and this is achieved in a resource-saving manner without foil, as Edelmann emphasises. CosmeticBusiness visitors can learn all about innovations in varnishes and paints as well as existing technologies at the company stand.

About CosmeticBusiness

In 2019, 449 exhibitors and represented companies from Germany and abroad presented at CosmeticBusiness, the international trade fair for the cosmetics supplying industry. CosmeticBusiness is the only international trade fair in Europe where the cosmetics industry meets exclusively with its suppliers and finds solutions for the development of all cosmetic products from active ingredients to manufacture and packaging. As the only industry meeting place in Germany, the largest cosmetics market in Europe, the B2B trade fair exhibition is an indispensable trend barometer for decision-makers from management, product management and development, marketing, as well as purchasing and production. CosmeticBusiness will be held from 30th September to 1 October 2020 at the MOC in Munich.
